

## A B S T R A C T

## A DOSE INDICATOR FOR A FLUID DISPENSER DEVICE

5        A dose indicator for a fluid dispenser device, said  
indicator comprising: a body (4); an actuator (1) that is  
mounted to turn relative to said body (4) about a first  
axis, and including drive means (14, 15); and a  
cylindrical indicator element (2) that is mounted to turn  
10 relative to said body (4) about a second axis and  
including a set of teeth (21) that co-operate with said  
drive means (14, 15) of said actuator (1) so as to turn  
each time the dispenser device is actuated, said  
indicator element (2) further including numeric and/or  
15 symbolic indicator means (25) so as to indicate to the  
user the number of doses that have been dispensed or that  
remain to be dispensed from said dispenser device; said  
actuator (1) co-operating with actuator means (7) secured  
to said body (4), said actuator means (7) being displaced  
20 in translation each time the dispenser device is  
actuated, and co-operating with said actuator (1) so as  
to transform the translation of said actuator means (7)  
into said actuator (1) turning.
